

FMR1 Polyclonal Antibody

E91413

- Catalog Number:** E91413
Amount: 100ul
Background: The selective RNA-binding protein FMRP forms a messenger ribonucleoprotein complex that associates with polyribosomes, implicating in regulation of translation. FMR1 is a component of the CYFIP1-EIF4E-FMR1 complex which binds to and represses the mRNA. It also has a role in the transport of mRNA from the nucleus to the cytoplasm.
Species: Rabbit
Isotype: IgG
Storage/Stability: Store at -20oC or -80oC. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
Synonyms: FMRP; FRAXA; MGC87458; POF; POF1
Immunogen: Recombinant protein of human FMR1
Purification: Affinity purification
Reactivity: H M R
Applications: WBIHCIFIP
Molecular Weight: 71kDa
Swiss-Prot No. : Q06787
Gene ID: 2332

For Research Use Only
