

CES2 Polyclonal Antibody

E91514

- Catalog Number:** E91514
Amount: 100ul
Background: This gene encodes a member of the carboxylesterase large family. The family members are responsible for the hydrolysis or transesterification of various xenobiotics, such as cocaine and heroin, and endogenous substrates with ester, thioester, or amide bonds. They may participate in fatty acyl and cholesterol ester metabolism, and may play a role in the blood-brain barrier system. The protein encoded by this gene is the major intestinal enzyme and functions in intestine drug clearance. Alternatively spliced transcript variants have been found for this gene.[provided by RefSeq, Oct 2010]
Species: Rabbit
Isotype: IgG
Storage/Stability: Store at -20oC or -80oC. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
Synonyms: iCE; CE-2; PCE-2; CES2A1;
Immunogen: A synthetic peptide of human CES2
Purification: Affinity purification
Reactivity: H M R
Applications: WB IHC
Molecular Weight: 62kDa
Swiss-Prot No. : O00748
Gene ID: 8824

For Research Use Only
