

UHRF2 Polyclonal Antibody

E92344**Catalog Number:** E92344**Amount:** 100ul

Background: This gene encodes a nuclear protein which is involved in cell-cycle regulation. The encoded protein is a ubiquitin-ligase capable of ubiquinating PCNP (PEST-containing nuclear protein), and together they may play a role in tumorigenesis. The encoded protein contains an NIRF_N domain, a PHD finger, a set- and ring-associated (SRA) domain, and a RING finger domain and several of these domains have been shown to be essential for the regulation of cell proliferation. This protein may also have a role in intranuclear degradation of polyglutamine aggregates. Alternative splicing results in multiple transcript variants some of which are non-protein coding. [provided by RefSeq, Feb 2012]

Species: Rabbit**Isotype:** IgG

Storage/Stability: Store at -20oC or -80oC. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Synonyms: NIRF; URF2; RNF107; RP11-472F14.2;**Immunogen:** Recombinant protein of human UHRF2**Purification:** Affinity purification**Reactivity:** H**Applications:** WB IHC IF**Molecular Weight:** 90kDa**Swiss-Prot No. :** Q96PU4**Gene ID:** 115426**For Research Use Only**

Western blot analysis of extracts of various cell lines,
using UHRF2 antibody.
