

APLP1 Polyclonal Antibody

E92634

- Catalog Number:** E92634
Amount: 100ul
Background: This gene encodes a member of the highly conserved amyloid precursor protein gene family. The encoded protein is a membrane-associated glycoprotein that is cleaved by secretases in a manner similar to amyloid beta A4 precursor protein cleavage. This cleavage liberates an intracellular cytoplasmic fragment that may act as a transcriptional activator. The encoded protein may also play a role in synaptic maturation during cortical development. Alternatively spliced transcript variants encoding different isoforms have been described.
Species: Rabbit
Isotype: IgG
Storage/Stability: Store at -20oC or -80oC. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
Synonyms: APLP;
Immunogen: Recombinant protein of human APLP1
Purification: Affinity purification
Reactivity: H M R
Applications: WB IHC
Molecular Weight: 72kD
Swiss-Prot No. : P51693
Gene ID: 333

For Research Use Only

line, using APLP1 antibody.
