

PPIB Polyclonal Antibody

E93142

- Catalog Number:** E93142
Amount: 100ul
Background: PPIB, also named as CYPB, SCYLP, PPlase B and CYP-S1, belongs to the cyclophilin-type PPlase family and PPlase B subfamily. PPlases accelerate the folding of proteins. It catalyzes the cis-trans isomerization of proline imidic peptide bonds in oligopeptides. PPIB is secreted in biological fluids such as blood or milk and binds to a specific receptor present on the human lymphoblastic cell line Jurkat and on human peripheral blood lymphocytes. This antibody is specific to PPIB.
Species: Rabbit
Isotype: IgG
Storage/Stability: Store at -20oC or -80oC. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
Synonyms: CYP-S1; CYPB; MGC14109; MGC2224; SCYLP;
Immunogen: Recombinant protein of human PPIB
Purification: Affinity purification
Reactivity: H M R
Applications: WB
Molecular Weight: 24kDa
Swiss-Prot No. : P23284
Gene ID: 5479

For Research Use Only
