

HLFPolyclonal Antibody

Catalog Number: E93143

Amount: 100ul

Background: This gene encodes a member of the proline and acidic-rich (PAR) protein family, a subset of

the bZIP transcription factors. The encoded protein forms homodimers or heterodimers with other PAR family members and binds sequence-specific promoter elements to activate transcription. Chromosomal translocations fusing portions of this gene with the E2A gene cause a subset of childhood B-lineage acute lymphoid leukemias. Alternatively spliced transcript variants have been described, but their biological validity has not been

determined. [provided by RefSeq, Jul 2008]

Species: Rabbit Isotype: IgG

Storage/Stability: Store at -20oC or -80oC. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide,

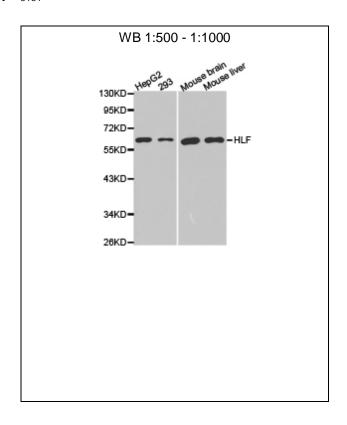

50% glycerol, pH7.3.

Synonyms: MGC33822; HLF;

Immunogen: Recombinant protein of human HLF

Purification: Affinity purification

Reactivity: H M R
Applications: WB
Molecular Weight: 33kDa
Swiss-Prot No.: Q16534
Gene ID: 3131

For Research Use Only

Western blot analysis of extracts of various celllines,
using HLF antibody.
