

GSK3B Polyclonal Antibody

E93174

- Catalog Number:** E93174
Amount: 100ul
Background: The protein encoded by this gene is a serine-threonine kinase, belonging to the glycogen synthase kinase subfamily. It is involved in energy metabolism, neuronal cell development, and body pattern formation. Polymorphisms in this gene have been implicated in modifying risk of Parkinson disease, and studies in mice show that overexpression of this gene may be relevant to the pathogenesis of Alzheimer disease. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
Species: Rabbit
Isotype: IgG
Storage/Stability: Store at -20oC or -80oC. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
Synonyms: glycogen synthase kinase 3 beta
Immunogen: A synthetic peptide of human GSK3B
Purification: Affinity purification
Reactivity: H M R
Applications: WB
Molecular Weight: 48kDa
Swiss-Prot No. : P49841
Gene ID: 2932

For Research Use Only
