

Enogene

PAK1 Polyclonal Antibody

E93279

Catalog Number: E93279**Amount:** 100ul

Background: This gene encodes a family member of serine/threonine p21-activating kinases, known as PAK proteins. These proteins are critical effectors that link RhoGTPases to cytoskeleton reorganization and nuclear signaling, and they serve as targets for the small GTP binding proteins Cdc42 and Rac. This specific family member regulates cell motility and morphology. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.

Species: Rabbit

Isotype: IgG

Storage/Stability: Store at -20oC or -80oC. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Synonyms: PAKalpha

Immunogen: A synthetic peptide of humanPAK1

Purification: Affinity purification

Reactivity: H M R

Applications: WB IHC

Molecular Weight: 61kDa

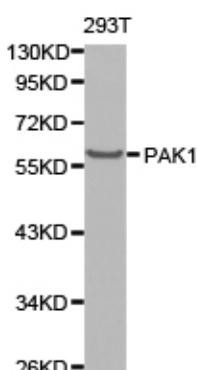

Swiss-Prot No.: Q13153

Gene ID: 5058

References:

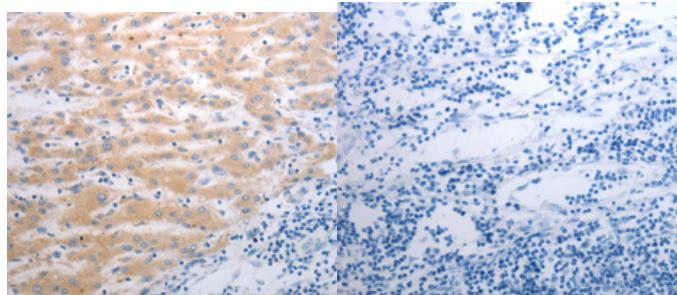

WB 1:500 - 1:2000

IHC 1:25- 1:100

For Research Use Only

Western blot analysis of extracts of 293T cellline, using PAK1antibody.

Immunohistochemistry of

paraffin-embedded human liver cancer tissue using PAK1 antibody.
