

	<h1>UPK1A Polyclonal Antibody</h1>	E 9 1 2 7 6 1
--	------------------------------------	---------------------------------

<b>Swiss-Prot No.:</b>	O00322
<b>Storage/Stability:</b>	Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
<b>Immunogen:</b>	Recombinant protein of human UPK1A (NP_008931.1).
<b>Purification:</b>	Affinity purification
<b>Reactivity:</b>	Mouse,Rat
<b>Other Names:</b>	—
<b>Background:</b>	<p>The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is found in the asymmetrical unit membrane (AUM) where it can complex with other transmembrane 4 superfamily proteins. It may play a role in normal bladder epithelial physiology, possibly in regulating membrane permeability of superficial umbrella cells or in stabilizing the apical membrane through AUM/cytoskeletal interactions. The protein may also play a role in tumor suppression. Alternative splicing results in multiple transcript variants of this gene.</p>
<b>Gene ID:</b>	11045

**For Research Use Only**

---

<b>Source:</b>	Rabbit
<b>Antibody type:</b>	Polyclonal Antibodies
<b>Isotype:</b>	IgG
<b>Molecular Weight:</b>	28kDa/30kDa
<b>Recommended Dilutions:</b>	WB 1:500 - 1:2000
