

**DATASHEET**

Version: 2016-08-17

**Albumin Antibody, pAb, Goat****Cat. No.:** A00127**Size:** 100 µg**Synonyms:** Goat Anti-Human Albumin pAb; Anti Human Albumin**Description:**

Albumin (Latin: albus, white) refers generally to any protein that is water soluble, is moderately soluble in concentrated salt solutions, and experiences heat denaturation. Albumins are commonly found in blood plasma, and are unique from other blood proteins in that they are not glycosylated. Substances containing albumin, such as egg white, are called albuminoids.

**Immunogen:** Albumin recombinant protein**Host:** Goat**Antigen Synonyms:** Human**Conjugation:** Unconjugated**Formulation:**

PBS, pH 7.4 with 0.05% sodium azide

**Ig Subclass:** Goat polyclonal**Specificity:** Goat Anti-Human Albumin Polyclonal Antibody specifically binds to human albumin.**Purification:** Immunoaffinity purification**Applications:****Western blot:** 1:500-1:1,000**ELISA:** 1:500-1:1,000**Species Reactivity:** Human**Storage:**

The antibody will remain stable for one year since the date of shipment if stored at -20°C. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezing and thawing. Aliquots will remain stable for three months if stored at 4°C.
