Purified Protein A

Cat. No.: Z02201-10

Size: 10.0 mg

Synonyms: Purified Protein A;

Description:

Purified protein A is a highly stable cell surface receptor produced by several strains of *Staphylococcus aureus*. With a molecular weight of 35,000 Da, it is made up of a single polypeptide chain containing five Ig-binding regions. Purified protein A is ideal for purification of polyclonal or monoclonal IgG antibodies. Purified protein A binds to most human and mouse IgG subclasses (e.g. human IgG1, IgG2, IgG4; mouse IgG1, IgG2a, IgG2b, IgG3). It also binds to total IgG from cow, guinea pig, hamster, horse, pig, and rabbit. Protein A has little affinity to

chicken IgY.

Source: *E. coli*

Molecular Weight: 35,000 Da

Formulation: Lyophilized from 1X PBS

Purity: This product is highly purified, SDS-PAGE and HPLC analyses revealed its purity of more than 95%.

Storage: Store the lyophilized powder at 4°C for several weeks, for long-term storage, store it at -20°C.
