

DATASHEET

Version 20181206

B7-H2/ICOSLG His, Human

Cat. No.: Z03415-100

Size: 100.0 µg

Synonyms: ICOSLG; B7-H2; B7H2; B7RP-1; B7RP1; CD275; GL50; ICOS-L; ICOSL; LICOS; ICOS ligand

Description:

B7-H2, best known as the ligand of inducible costimulator, belongs to B7-CD28 family, is a transmembrane glycoprotein of approximately 60 kDa. B7-H2 is expressed on antigen presenting cells such as B cells, macrophages, dendritic cells, and also in monocytes, and is a ligand for CD28 and CTLA-4 in human, whereas these interactions are not conserved in mouse. B7-H2 and B7-1 or B7-2 interacted with CD28 through distinctive domains. B7-H2-CD28 interaction is essential for the costimulation of human T cells' primary responses to allogeneic antigens and memory recall responses.

Recombinant Human B7-H2/ICOSLG produced in HEK293 cells is a polypeptide chain containing 250 amino acids with C-terminal 10His. A fully biologically active molecule, rhB7-H2/ICOSLG has a molecular mass of 45-55 kDa analyzed by reducing SDS-PAGE and is obtained by chromatographic techniques at GenScript.

Source: HEK293

Species: Human

Biological Activity: Immobilized B7-H2-6His, Human at 1µg/mL (100 µL/well) can bind ICOS Fc Chimera, Human(Z03412) with a linear range of 2.29-185.2ng/mL.

Molecular Weight: 45-55 kDa, observed by reducing SDS-PAGE.

Formulation: Lyophilized from a 0.2 µm filtered solution in PBS, 5% trehalose and mannitol.

Reconstitution: Reconstituted in ddH₂O or PBS at 100 µg/ml.

Purity: > 95% as analyzed by reducing SDS-PAGE.

Endotoxin Level: < 0.2 EU/µg, determined by LAL method.

Storage: Lyophilized recombinant B7-H2/ICOSLG, His, Human remains stable up to 6 months at lower than -70°C from date of receipt. Upon reconstitution, Human B7-H2/ICOSLG should be stable up to 1 week at 4°C or up to 3 months at -20°C. For long term storage it is recommended that a carrier protein (example 0.1% BSA) be added. Avoid repeated freeze-thaw cycles.
