

PRODUCT PROFILE

PRODUCT: Purified Cat Haptoglobin

CATALOG NUMBER: AG-20HPT

LOT NUMBER:

QUANTITY:

PHYSICAL STATE: Lyophilized

BUFFER: PBS with non-protein stabilizer

PRESERVATIVE: None added

STORAGE: Lyophilized material should be kept at 2 - 8°C until rehydrated and will remain stable for a minimum of 1 year.
Rehydrate by adding 1.0 mL of reagent quality water to the product vial. Store the liquid solution at 2 - 8°C for up to a week; thereafter, aliquots should be prepared and stored frozen between -20C and -80C.

EXPIRATION: 12 months from shipping date.

PROCEDURE: This cat haptoglobin is purified from cat serum using salt fractionation and column chromatography. Protein concentration was determined prior to lyophilization using an absorbance at 280 nm: 1.2 equals 1.0 mg of haptoglobin.

SPECIFICATIONS: This product is suitable for use in ELISA, LFD, western blot and other immunoassays. Optimal working dilutions should be determined experimentally by the investigator.
