Mouse anti-LukS-PV mAb (1D9)

Catalog #: 0221-001

Lot #: 1312002

Immunogen: Recombinant LukS-PV (His tag)

Description: Mouse monoclonal antibody reactive to a conformational epitope of *Staphylococcus aureus* Pantone Valentine Leukocidin LukS subunit.

Supplied: 100 µg is supplied in PBS at a concentration of 3.98 mg/mL.

Purification: Antibody is purified using immobilized protein A.

Clonality: Monoclonal of the IgG_{2b} isotype.

Relevance: The antibody can be used for detection of LukS-PV in an ELISA sandwich assay. It is not recommended for denatured Western blot detection due to the recognition of a partially conformational epitope of the LukS.

Recommended Dilutions:

ELISA: Assay-dependent dilution. Internal QC demonstrates good capture of purified recombinant LukS-PV using this monoclonal antibody coated to a plate at 100 ng/well.

WB: It is not recommended to use this antibody for Western Blotting application due to weak detection of LukS-PV.

Storage: 2-3 weeks +4°C, -20°C long term

Cross Reactivity: As with most antibodies, this antibody may interact with Protein A in *S. aureus* culture supernatant via the Fc region. Other cross reactive epitopes are not known at this time.

ELISA Data:

Antigen Conc. (µg/mL)	OD 650	
	LukS-PV (His-tag)	MVP40 (His-tag)
1.0000	3.6910	0.1380
0.3333	3.6000	0.1420
0.1111	3.5800	0.1460
0.0370	3.4180	0.1450
0.0123	2.4840	0.1500
0.0041	1.0970	0.1520
0.0014	0.4310	0.1500

	1:243	0.200
	1:729	0.169

1D9 was used as Capture Antibody in a sandwich ELISA to detect purified LukS-PV or native LukS-PV from *S. aureus* USA300 6-hour culture supernatant. Purified LukS-PV was tested starting 1 µg/mL followed by three-fold serial dilutions and His-tagged recombinant VP40 was tested as a negative control. Bacterial supernatant was tested undiluted followed by three-fold serial dilutions. Secondary Antibody was a Polyclonal anti-PVL LukS antibody (cat# 04-0009). Detection was accomplished using an anti-rabbit IgG-HRP conjugate, followed by TMB substrate. OD650 are as reported.
