

Cynomolgus/Rhesus macaque B2M/beta 2-Microglobulin Protein

Cat. No. B2M-CM101

Description	
Source	Recombinant Cynomolgus/Rhesus macaque B2M/beta 2-Microglobulin Protein is expressed from HEK293 with His tag at the C-Terminus. It contains Ile21-Met119.
Accession	Q8SPW0
Molecular Weight	The protein has a predicted MW of 12.7 kDa. Due to glycosylation, the protein migrates to 13-15 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1 EU per µg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

Formulation and Storage	
Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Storage	-20 to -80°C for 12 months as supplied from date of receipt.-80°C for 3 months after reconstitution.Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background	
The genetic and functional analysis of β2-microglobulin (B2M), a component of the HLA class-I complex.Acquired homozygous loss of B2M that caused lack of cell-surface HLA Class I expression in the tumor and a matched patient-derived xenograft (PDX). Downregulation of B2M was also found in two additional PDXs established from ICI-resistant tumors.	

Assay Data

Bis-Tris PAGE

Cynomolgus/Rhesus macaque B2M on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Assay Data

The purity of Cynomolgus/Rhesus macaque B2M is greater than 95% as determined by SEC-HPLC.
