Mouse B7-1/CD80 Protein

Cat. No. B71-MM180

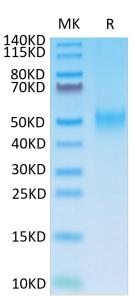

Description	
Source	Recombinant Mouse B7-1/CD80 Protein is expressed from HEK293 with His tag at the C-Terminus.
	It contains Val38-Asn246.
Accession	Q00609-1
Molecular Weight	The protein has a predicted MW of 24.6 kDa. Due to glycosylation, the protein migrates to 48-55 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1 EU per μg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE
	> 95% as determined by HPLC
Formulation and Storage	
Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Storage	-20 to -80°C for 12 months as supplied from date of receipt80°C for 3 months after reconstitution.Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.
Background	
	Cluster of differentiation 80 (also CD80 and B7-1) is a protein found on dendritic cells, activated B cells and

different proteins on the T cell surface: CD28 and CTLA-4.

monocytes that provides a costimulatory signal necessary for T cell activation and survival. It is the ligand for two

Assay Data

Bis-Tris PAGE

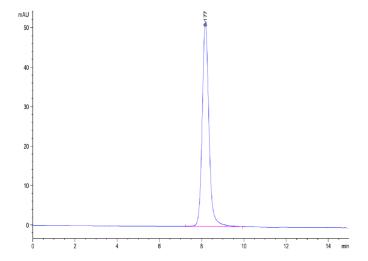

Mouse B7-1 on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Cat. No. B71-MM180

Assay Data

The purity of Mouse B7-1 is greater than 95% as determined by SEC-HPLC.
