

Human EPO/Erythropoietin Protein

Cat. No. EPO-HM001

Description	
Source	Recombinant Human EPO/Erythropoietin Protein is expressed from HEK293 without tag. It contains Ala28-Arg193.
Accession	AAH93628.1
Molecular Weight	The protein has a predicted MW of 18.39 kDa. Due to glycosylation, the protein migrates to 35-45 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 0.1 EU per µg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

Formulation and Storage	
Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Storage	-20 to -80°C for 12 months as supplied from date of receipt.-80°C for 3 months after reconstitution.Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background	
Erythropoietin (EPO) is a circulating hormone conventionally considered to be responsible for erythropoiesis. In addition to facilitating red blood cell production, EPO has pluripotent potential, such as for cognition improvement, neurogenesis, and anti-fibrotic, anti-apoptotic, anti-oxidative, and anti-inflammatory effects.	

Assay Data

Bis-Tris PAGE

Human EPO on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Human EPO/Erythropoietin Protein

Cat. No. EPO-HM001

Assay Data

The purity of Human EPO is greater than 95% as determined by SEC-HPLC.

Cell Based Assay

Measured in a cell proliferation assay using TF1 human erythroleukemic cells. The ED50 for this effect is 0.4 1 ng/mL (QC Test).

ELISA Data

Immobilized Human EPO, No Tag at 1µg/ml (100µl/well) on the plate. Dose response curve for Human EPO R, hFc Tag with the EC50 of 29.7ng/ml determined by ELISA.
