## Biotinylated Human uPAR/PLAUR Protein

instructions.

#### Cat. No. PAR-HM401B

Description	
Source	Recombinant Biotinylated Human uPAR/PLAUR Protein is expressed from HEK293 with His tag and Avi tag at the C-Terminus.
	It contains Leu23-Gly305.
Accession	Q03405-1
Molecular Weight	The protein has a predicted MW of 34.36 kDa. Due to glycosylation, the protein migrates to 50-65 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1 EU per μg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE
	> 95% as determined by HPLC
Formulation and	Storage
Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed

Background

Storage

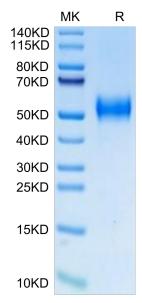

The receptor (u-PAR) for urokinase plasminogen activator (u-PA) is a three-domain protein, GPI-anchored to the cell surface, which focuses the enzymatic activity of u-PA, and allows the cell surface activation of plasminogen. Regulation of the activity of u-PA is also mediated by u-PAR.

-20 to -80°C for 12 months as supplied from date of receipt.-80°C for 3 months after reconstitution.Recommend

to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

### **Assay Data**

### **Bis-Tris PAGE**

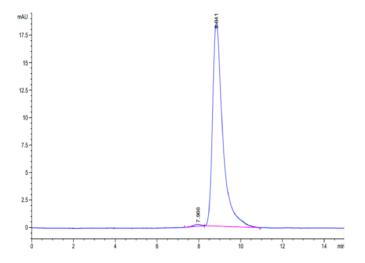

Biotinylated Human uPAR on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

# KAGTUS

## **Assay Data**

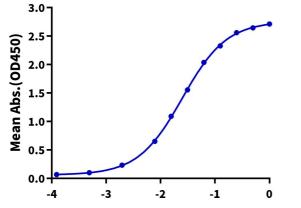

The purity of Biotinylated Human uPAR is greater than 95% as determined by SEC-HPLC.

### **ELISA Data**

## Biotinylated Human uPAR, His Tag ELISA

0.2μg Human PLAU, His Tag Per Well

Log Biotinylated Human uPAR, His Tag Conc.(μg/ml)

Immobilized Human PLAU, His Tag at  $2\mu g/ml$  (100 $\mu$ l/well) on the plate. Dose response curve for Biotinylated Human uPAR, His Tag with the EC50 of 25.1ng/ml determined by ELISA (QC Test).
