#### Mouse PRLR Protein

#### Cat. No. PLR-MM101

Description	
Source	Recombinant Mouse PRLR Protein is expressed from HEK293 with His tag at the C-Terminus.
	It contains Gln20-Asp229.
Accession	Q08501-1
Molecular Weight	The protein has a predicted MW of 25.7 kDa. Due to glycosylation, the protein migrates to 38-45 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1 EU per μg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE
	> 95% as determined by HPLC

## Formulation and Storage

Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Storage	-20 to -80°C for 12 months as supplied from date of receipt80°C for 3 months after reconstitution.Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

## Background

Prolactin receptor (PRLR) is highly expressed in a subset of human breast cancer and prostate cancer, which makes it a potential target for cancer treatment. In clinical trials, the blockade of PRLR was shown to be safe but with poor efficacy. It is therefore urgent to develop new therapies against PRLR target. Bispecific antibodies (BsAbs) could guide immune cells toward tumor cells, and produced remarkable effects in some cancers.

## **Assay Data**

#### **Bis-Tris PAGE**

Mouse PRLR on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Cat. No. PLR-MM101

# **Assay Data**

The purity of Mouse PRLR is greater than 95% as determined by SEC-HPLC.
