

Mouse CD45/PTPRC Protein

Cat. No. PTP-MM201

Description	
Source	Recombinant Mouse CD45/PTPRC Protein is expressed from HEK293 with hFc tag at the C-Terminus. It contains Gln26-Lys427.
Accession	P06800-6
Molecular Weight	The protein has a predicted MW of 71.46 kDa. Due to glycosylation, the protein migrates to 100-130 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1 EU per µg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

Formulation and Storage	
Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background	
	PTPRC (also known as CD45), T cells require the protein tyrosine phosphatase CD45 to detect and respond to antigen because it activates the Src family kinase Lck, which phosphorylates the T cell antigen receptor (TCR) complex. CD45 activates Lck by opposing the negative regulatory kinase Csk. Paradoxically, CD45 has also been implicated in suppressing TCR signaling by dephosphorylating the same signaling motifs within the TCR complex upon which Lck acts.

Assay Data

Bis-Tris PAGE

Mouse CD45 on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

## Mouse CD45/PTPRC Protein

Cat. No. PTP-MM201

### Assay Data

The purity of Mouse CD45 is greater than 95% as determined by SEC-HPLC.
