PRODUCT DATASHEET

For Research Use Only

DESCRIPTION: Apigenin 7-glucoside is a flavonoid with anti-inflammatory, antioxidant,

anticancer, anti-adipogenic and anxiolytic activities. It has been shown to

inhibit LPS-induced nitric oxide production in RAW 264.7 cells or have hepatoprotective activity due to it's antioxidant activities, acting as scavengers of ROS. Apigenin 7-glucoside has been shown to have antiproliferative activity, possible through cell cycle inhibition and consequently induce apoptosis. it also has the ability to enhance

melanogenesis synthesis and tyrosinase activity of B16F10 melanoma cells.

Apigenin 7-glucoside has shown neuroprotective effects possibly by inhibiting

neuroinflammation and its antioxidant activity. Apigenin-7-0-glucoside

inhibits adipogenesis of 3T3-L1 preadipocytes at early stage of adipogenesis

at high concentrations, by downregulating PPARgamma and CEBP-alpha.

SPECIFIC AGAINST: Other

BACKGROUND:

TYP: Chemicals

CATEGORY: Reagents & Chemicals/Biochemicals/Carbohydrates & Derivatives

DETAILED - CATEGORY:Biochemical Compounds

HOW TO HANDLE/USE THE PRODUCT:

STORAGE CONDITIONS: Stable for 2 years after receipt when stored at -20°C.

STORAGE BUFFER: Powder SHIPPED ON DRY ICE: No
