

Product Name : Povidone-iodine

Synonyms : (PVP-I)

Cat No. : M13774

CAS Number : 25655-41-8

Molecular Formula : C₆H₉I₂NO

Formula Weight : 364.95

Chemical Name : —

Description : Povidone-iodine is an iodinated polyvinyl polymer used as topical antiseptic in surgery and for skin and mucous membrane infections, also as aerosol. The iodine may be radiolabeled for research purposes.

Pathway : Others

Target : Other Targets

Receptor : Others

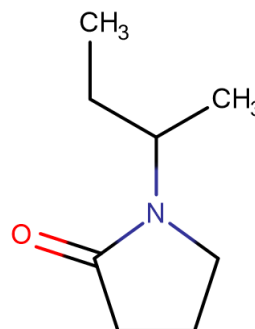

Solubility : DMSO: 10 mM

SMILES : CCC(C)N1CCCC1=O

Storage : (-20°C)

Stability : ≥ 2 years
