| <b>Cat No.</b>           | : M23652                                                                           |
| <b>CAS Number</b>        | : 1515888-53-5                                                                     |
| <b>Molecular Formula</b> | : C <sub>26</sub> H <sub>25</sub> N <sub>5</sub> O                                 |
| <b>Formula Weight</b>    | : 423.5                                                                            |
| <b>Chemical Name</b>     | : —                                                                                |
| <b>Description</b>       | : UCB-9260 inhibits TNF signaling by stabilizing an asymmetric form of the trimer. |
| <b>Pathway</b>           | : Apoptosis                                                                        |
| <b>Target</b>            | : TNF                                                                              |
| <b>Receptor</b>          | : TNF                                                                              |
| <b>Solubility</b>        | : DMSO:10 mM                                                                       |
| <b>SMILES</b>            | : <chem>OC(C1=CC=NC=C1)C2=NC3=CC=C(C4=CN(C)N=C4)C=C3N2CC5=CC(C)=CC=C5C</chem>      |
| <b>Storage</b>           | : (-20°C)                                                                          |
| <b>Stability</b>         | : ≥ 2 years                                                                        |
| <b>Reference</b>         | :                                                                                  |
