|--------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>Product Name</b>      | : Pratensein                                                                                              |
| <b>Synonyms</b>          | : —                                                                                                       |
| <b>Cat No.</b>           | : M24038                                                                                                  |
| <b>CAS Number</b>        | : 2284-31-3                                                                                               |
| <b>Molecular Formula</b> | : C <sub>16</sub> H <sub>12</sub> O <sub>6</sub>                                                          |
| <b>Formula Weight</b>    | : 300.3                                                                                                   |
| <b>Chemical Name</b>     | : —                                                                                                       |
| <b>Description</b>       | : Pratensein as a novel transcriptional up-regulator of scavenger receptor class B type I in HepG2 cells. |
| <b>Pathway</b>           | : Others                                                                                                  |
| <b>Target</b>            | : Other Targets                                                                                           |
| <b>Receptor</b>          | : Others                                                                                                  |
| <b>Solubility</b>        | : —                                                                                                       |
| <b>SMILES</b>            | : <chem>COC1=C(C=C(C=C1)C2=COC3=CC(=CC(=C3C2=O)O)O)O</chem>                                               |
| <b>Storage</b>           | : (-20°C)                                                                                                 |
| <b>Stability</b>         | : ≥ 2 years                                                                                               |
| <b>Reference</b>         | :                                                                                                         |

1.Protective effect of isoflavones from Trifolium pratense on dopaminergic neurons.Neurosci Res. 2008 Oct;62(2):123-30.
