

Recombinant human AK5 protein

Catalog Number: ATGP1263

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-562aa

UniProt No.

Q9Y6K8

NCBI Accession No.

AAH36666

Alternative Names

Adenylate kinase isoenzyme 5, AK6

PRODUCT SPECIFICATION

Molecular Weight

65.9 kDa (586aa)

Concentration

0.25mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 20% glycerol, 1mM DTT

Purity

> 85% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

AK5, also known as adenylate kinase isoenzyme 5, is a member of the adenylate kinase family, which is involved in regulating the adenine nucleotide composition within a cell by catalyzing the reversible transfer of phosphate groups among adenine nucleotides. This member is related to the uMP/CMP kinase of several species. It is located in the cytosol and expressed exclusively in brain. Recombinant human AK5 protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional chromatography.
