

Recombinant human PCK1 protein

Catalog Number: ATGP1372

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-622aa

UniProt No.

P35558

NCBI Accession No.

AAH23978

Alternative Names

Phosphoenolpyruvate carboxykinase 1, Phosphoenolpyruvate carboxykinase 1, PEPCK-C, PEPCK1, PEPCKC

PRODUCT SPECIFICATION

Molecular Weight

71.7 kDa (646aa)

Concentration

0.5mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 1mM DTT, 10% glycerol, 0.1M NaCl

Purity

> 90% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

Phosphoenolpyruvate carboxykinase 1, also known as PCK1, is a main control point for the regulation of gluconeogenesis. PCK1 plays an important role in this process by stimulating hepatic glucose production. The expression of PCK1 can be regulated by insulin, glucocorticoids, glucagon, cAMP, and diet. Modulation of the signals governing PCK1 levels presents a potential therapeutic approach to the treatment of Insulin resistance and consequently obesity. Recombinant human PCK1 protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional chromatography techniques.
