

Recombinant human TBCC protein

Catalog Number: ATGP1673

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-346aa

UniProt No.

Q15814

NCBI Accession No.

NP_003183

Alternative Names

Tubulin-specific chaperone C, CFC, tubulin folding cofactor C

PRODUCT SPECIFICATION

Molecular Weight

41.7 kDa (369aa) confirmed by MALDI-TOF

Concentration

0.5mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 0.1M NaCl, 10% glycerol, 1mM DTT

Purity

> 85% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

TBCC (tubulin folding cofactor C) belongs to the TBCC family. It plays a role in the regulation of centrosome and Golgi apparatus positioning, with consequences on cell shape and cell migration. Cofactor C is one of four proteins (cofactors A, D, E and C) involved in the pathway leading to correctly folded b-tubulin from folding intermediates. Cofactors A and D are believed to play a role in capturing and stabilizing b-tubulin intermediates in a quasi-native confirmation. Cofactor E binds to the cofactor D/b-tubulin complex; interaction with cofactor C then causes the release of b-tubulin polypeptides. Recombinant human TBCC protein, fused to His-tag at N-

Recombinant human TBCC protein
