

Recombinant human Apolipoprotein A5/APOA5 protein

Catalog Number: ATGP2476

PRODUCT INFORMATION

Expression system

E.coli

Domain

24-366aa

UniProt No.

Q6Q788

NCBI Accession No.

NP_443200

Alternative Names

Apolipoprotein A-V precursor, Apolipoprotein A-V, APOAV, RAP3

PRODUCT SPECIFICATION

Molecular Weight

41.3 kDa (366aa)

Concentration

0.25mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing , 10% glycerol, 0.4M urea

Purity

> 85% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE, Denatured

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

APOA5 is an apolipoprotein that plays an important role in regulating the plasma triglyceride levels, a major risk factor for coronary artery disease. It is a component of high density lipoprotein and is highly similar to a rat protein that is upregulated in response to liver injury. Mutations in this gene have been associated with hypertriglyceridemia and hyperlipoproteinemia type 5. This gene is located proximal to the apolipoprotein gene cluster on chromosome 11q23. Alternatively spliced transcript variants encoding the same protein have been identified. Recombinant human APOA5 protein, fused to His-tag at N-terminus, was expressed in E. coli.
