

Recombinant human Otoraplin/OTOR protein

Catalog Number: ATGP3016

PRODUCT INFORMATION

Expression system

E.coli

Domain

26-128aa

UniProt No.

Q9NRC9

NCBI Accession No.

NP_064542

Alternative Names

Otoraplin, Otoraplin, FDP, MIAL1

PRODUCT SPECIFICATION

Molecular Weight

14.3 kDa (128aa)

Concentration

0.25mg/ml (determined by Bradford assay)

Formulation

Liquid in. Phosphate-Buffered Saline (pH 7.4) containing 30% glycerol, 1mM DTT

Purity

> 90% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

OTOR also known as Otoraplin, is a member of the melanoma-inhibiting activity gene family. The protein is secreted via the Golgi apparatus and may function in cartilage development and maintenance. A frequent polymorphism in the translation start codon of this gene can abolish translation and may be associated with forms of deafness. Recombinant human OTOR protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional chromatography techniques.

DATA

SDS-PAGE

3ug by SDS-PAGE under reducing condition and visualized by coomassie blue stain.
