

Recombinant human ST6GAL1 protein

Catalog Number: ATGP3338

PRODUCT INFORMATION

Expression system

Baculovirus

Domain

27-406aa

UniProt No.

P15907

NCBI Accession No.

NP_775323

Alternative Names

Beta-galactoside alpha-2,6-sialyltransferase 1, ST6GAL1, SIAT1, ST6GalI, ST6N

PRODUCT SPECIFICATION

Molecular Weight

44.6 kDa (389aa)

Concentration

0.5mg/ml (determined by absorbance at 280nm)

Formulation

Liquid in. Phosphate-Buffered Saline (pH 7.4) containing 10% glycerol

Purity

> 90% by SDS-PAGE

Endotoxin level

< 1 EU per 1ug of protein (determined by LAL method)

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

ST6GAL1, also known as beta-galactoside alpha-2, 6-sialyltransferase 1, is a type II membrane protein localized in the trans-Golgi network and catalyzes 2, 6-sialylation of Gal beta 1, 4-GlcNAc structures on N-glycans. It is highly expressed in the liver and also expressed in most other tissues to some extent. Its deficiency causes abnormalities in B cell immunoreactivity. Recombinant human ST6GAL1, fused to His-tag at C-terminus, was

Recombinant human ST6GAL1 protein

Catalog Number: ATGP3338

expressed in insect cell and purified by using conventional chromatography techniques.
