

Recombinant mouse ACE-2 protein

Catalog Number: ATGP4014

PRODUCT INFORMATION

Expression system

Baculovirus

Domain

18-740aa

UniProt No.

Q8R0I0

NCBI Accession No.

NP_081562.2

Alternative Names

Angiotensin-converting enzyme 2, ACE-related carboxypeptidase, Processed Angiotensin-converting enzyme 2, ACE2, 2010305L05Rik

PRODUCT SPECIFICATION

Molecular Weight

84.5 kDa (731aa)

Concentration

1mg/ml (determined by absorbance at 280nm)

Formulation

Liquid in. Phosphate-Buffered Saline (pH 7.4) containing 10% glycerol

Purity

> 95% by SDS-PAGE

Endotoxin level

< 1 EU per 1ug of protein (determined by LAL method)

Biological Activity

Specific activity is > 200 pmol/min/ug, and is defined as the amount of enzyme that hydrolysis 1.0 pmole of Mca-YVADAPK(Dnp)-OH per minute at pH 7.5, at 25C.

Tag

His-Tag

Application

SDS-PAGE, Enzyme Activity

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

Recombinant mouse ACE-2 protein

Catalog Number: ATGP4014

BACKGROUND

Description

ACE-2, also known as angiotensin-converting enzyme 2, is an integral membrane protein and a zinc metalloprotease of the ACE family that also includes somatic and germinal ACE. It cleaves angiotensin 1 to angiotensin 1-9 and angiotensin 2 to angiotensin 1-7 as a carboxypeptidase. It may be an important regulator of heart function and have a protective role in acute lung injury. Also, it is a key SARS-CoV Spike protein receptor in vivo. Recombinant mouse ACE-2, fused to His-tag at C-terminus, was expressed in insect cell and purified by using conventional chromatography techniques.
