

Human Granzyme B Activity Assay Reagent Set

- Quantitative measurement of active human Granzyme B
- Also recognizes mouse Granzyme B
- 96-well plate format (2 plates per set)
- Colorimetric read-out at 405 nm
- Ability to detect high and low ranges in one assay
- Easy and sensitive
- Low costs per sample

Assay specifications

Dynamic range: 0.05 - 10 ng/ml

Sensitivity: 0.01 ng/ml (24 hr incubation)

Sample volume: 10 - 100 µl

Format: 96 - well plate

Intended use:

- tissue homogenate
- conditioned culture medium
- serum
- urine

Quantitative measurement

Assay principle

What's in the box?

The following reagents are included: 2x Non-coated 96-well microplate, 2x Coating antibody solution, 2x Granzyme B standard, 2x Detection enzyme, 2x Chromogenic substrate, Protocol.
