GENERAL INFORMATION

Immunogen:	A synthetic peptide corresponding to the center region of the Human CD10/Neprilysin/MME
Preparation	This antibody was obtained from a rabbit immunized with a synthetic peptide corresponding to the center region of the Human CD10/Neprilysin/MME.
Ig Type:	Rabbit IgG
Clone ID:	113
Specificity:	Human CD10/Neprilysin/MME
Formulation:	0.2 µm filtered solution in PBS
Storage:	This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Avoid repeated freeze-thaw cycles.
Alternative Names:	CALLA,CD10,NEP,SFE

APPLICATIONS

Applications:	ICC/IF
----------------------	--------

RECOMMENDED CONCENTRATION

ICC/IF	ICC/IF: 1:20-1:100
---------------	--------------------

Please Note: Optimal concentrations/dilutions should be determined by the end user.

Immunofluorescence staining of MME in MCF7 cells. Cells were fixed with 4% PFA, blocked with 10% serum, and incubated with rabbit anti-human MME monoclonal antibody (dilution ratio 1:60) at 4°C overnight. Then cells were stained with the Alexa Fluor®488-conjugated Goat Anti-rabbit IgG secondary antibody (green). Positive staining was localized to Cell membrane.
