Flow cytometric analysis of Human IL-6R expression on U266 cells. Cells were stained with FITC-conjugated anti-Human IL-6R. The fluorescence histograms were derived from gated events with the forward and side light-scatter characteristics of intact cells.

Flow cytometry was performed on a BD FACSCalibur flow cytometry system. Please refer to www.sinobiological.com/Flow-Cytometry-FACS-Protocols-a-750.html for technical protocols.
