Flow cytometric analysis of Human PDGFR α (CD140a) expression on MG63 cells. Cells were stained with PE-conjugated anti-Human PDGFR α (CD140a). The fluorescence histograms were derived from gated events with the forward and side light-scatter characteristics of intact cells.

Flow cytometry was performed on a BD FACSCalibur flow cytometry system. Please refer to www.sinobiological.com/Flow-Cytometry-FACS-Protocols-a-750.html for technical protocols.
