Catalog Number: 10902-MM11

## GENERAL INFORMATION

|              |                                                                                                                                                                                                                                                                                                                                                                    |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Immunogen:   | Recombinant Human CCNE1 / Cyclin-E1 protein (Catalog#10902-H07B)                                                                                                                                                                                                                                                                                                   |
| Preparation  | This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, recombinant Human CCNE1 / Cyclin-E1 (rh CCNE1 / Cyclin-E1; Catalog#10902-H07B; NP_001229.1; Met1-Ala410). The IgG fraction of the cell culture supernatant was purified by Protein A affinity chromatography. |
| Ig Type:     | Mouse IgG1                                                                                                                                                                                                                                                                                                                                                         |
| Clone ID:    | 11                                                                                                                                                                                                                                                                                                                                                                 |
| Specificity: | Human CCNE1 / Cyclin-E1                                                                                                                                                                                                                                                                                                                                            |
| Formulation: | 0.2 µm filtered solution in PBS                                                                                                                                                                                                                                                                                                                                    |
| Storage:     | This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Avoid repeated freeze-thaw cycles.                                                                                                                 |

## APPLICATIONS

|               |       |
|---------------|-------|
| Applications: | IHC-P |
|---------------|-------|

## RECOMMENDED CONCENTRATION

|       |                   |
|-------|-------------------|
| IHC-P | IHC-P: 1:50-1:200 |
|-------|-------------------|

**Please Note: Optimal concentrations/dilutions should be determined by the end user.**

# CCNE1 / Cyclin-E1 Antibody, Mouse MAb

Sino Biological  
Biological Solution Specialist

Catalog Number: 10902-MM11

Immunohistochemical staining of human CCNE1 in human placenta with mouse monoclonal antibody (1:60, formalin-fixed paraffin embedded sections). The image showing nucleus staining of cells.

Immunohistochemical staining of human CCNE1 in human ovarian cancer with mouse monoclonal antibody (1:60, formalin-fixed paraffin embedded sections). The image showing nucleus staining of cells.

Immunohistochemical staining of human CCNE1 in human colon carcinoma with mouse monoclonal antibody (1:60, formalin-fixed paraffin embedded sections). The image showing nucleus staining of cells.
