

ITCH / AIP4 Antibody (FITC), Mouse MAb

Sino Biological
Biological Solution Specialist

Catalog Number: 11131-MM01-F

GENERAL INFORMATION

Immunogen:	Recombinant Human ITCH / AIP4 protein (Catalog#11131-HNCE)
Reagents:	FITC-conjugated Mouse monoclonal antibody
Preparation	This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, recombinant Human ITCH / AIP4 (rh ITCH / AIP4; Catalog#11131-HNCE; NP_113671.3; Arg 526-Glu 903) and conjugated with FITC under optimum conditions, the unreacted FITC was removed.
Ig Type:	Mouse IgG1
Clone ID:	01
Specificity:	Human ITCH / AIP4
Concentration:	10 µl/Test, 0.1 mg/ml
Formulation:	Aqueous solution containing 0.5% BSA and 0.09% sodium azide
Storage:	This antibody is stable for 12 months from date of receipt when stored at 2°C-8°C. Protected from prolonged exposure to light. Do not freeze! Sodium azide is toxic to cells and should be disposed of properly. Flush with large volumes of water during disposal.

APPLICATIONS

Applications:	FCM

Catalog Number: 11131-MM01-F

Flow cytometric analysis of Human ITCH expression in HeLa cells. The cells were treated according to manufacturer's manual (BD Pharmingen™ Cat. No. 554714), and then stained with FITC Mouse anti-ITCH (11131-MM01-F). The fluorescence histograms were derived from gated events with the forward and side light-scatter characteristics of intact cells.

Flow cytometry was performed on a BD FACSCalibur flow cytometry system. Please refer to www.sinobiological.com/Flow-Cytometry-FACS-Protocols-a-750.html for technical protocols.
