Flow cytometric analysis of Mouse SELPLG(CD162) expression on BABL/c splenocytes. Cells were stained with APC-conjugated anti-Mouse SELPLG(CD162). The fluorescence histograms were derived from gated events with the forward and side light-scatter characteristics of intact cells.

Flow cytometry was performed on a BD FACSCalibur flow cytometry system. Please refer to www.sinobiological.com/Flow-Cytometry-FACS-Protocols-a-750.html for technical protocols.
