Flow cytometric analysis of Mouse SIRPA(CD172a) expression on BABL/c bone marrow cells. Cells were stained with FITC-conjugated anti-Mouse SIRPA(CD172a). The fluorescence histograms were derived from gated events with the forward and side light-scatter characteristics of intact cells.

Flow cytometry was performed on a BD FACSCalibur flow cytometry system. Please refer to www.sinobiological.com/Flow-Cytometry-FACS-Protocols-a-750.html for technical protocols.
