

Mouse MFI2 / CD228 / melanotransferrin Protein (His Tag)

Catalog Number: 50994-M08H

Sino Biological
Biological Solution Specialist

General Information

Gene Name Synonym:

CD228; MTf

Protein Construction:

A DNA sequence encoding the mouse MFI2 (Q9R0R1?) (Met 1-Gln 708), without the propeptide, was fused with a C-terminal polyhistidine tag.

Source: Mouse

Expression Host: HEK293 Cells

QC Testing

Purity: > 95 % as determined by SDS-PAGE

Endotoxin:

< 1.0 EU per µg of the protein as determined by the LAL method

Stability:

Samples are stable for up to twelve months from date of receipt at -70 °C

Predicted N terminal: Val 20

Molecular Mass:

The secreted recombinant mouse MFI2 comprises 700 amino acids and has a calculated molecular mass of 77.5 kDa. The apparent molecular mass of rmMFI2 is approximately 80 kDa in SDS-PAGE under reducing conditions.

Formulation:

Lyophilized from sterile PBS, pH 7.4

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. Specific concentrations are included in the hardcopy of COA. Please contact us for any concerns or special requirements.

Usage Guide

Storage:

Store it under sterile conditions at -20°C to -80°C upon receiving. Recommend to aliquot the protein into smaller quantities for optimal storage.

Avoid repeated freeze-thaw cycles.

Reconstitution:

Detailed reconstitution instructions are sent along with the products.

SDS-PAGE:
