

Rat Thrombopoietin / THPO Gene cDNA clone plasmid

Sino Biological Inc.
Biological Solution Specialist

Catalog Number: RG80081-M

General Information

Gene : thrombopoietin
Official Symbol : THPO
Synonym : Thpo
Source : *Rat*
cDNA Size: 981bp
RefSeq : NM_031133.1
Plasmid: pMD-19-ratTHPO

Description

Lot : Please refer to the label on the tube

Sequence Description :

Identical with the Gene Bank Ref. ID sequence.

Vector :

pMD19-T

Shipping carrier :

Each tube contains approximately 10 µg of lyophilized plasmid.

Storage :

The lyophilized plasmid can be stored at ambient temperature for three months.

Quality control :

The plasmid is confirmed by full-length sequencing with primers in the sequencing primer list.

Sequencing primer list :

M13-47 : 5' GCCAGGGTTTCCCAGTCACGAC 3'

RV-M : 5' GAGCGGATAACAATTTACACAGG 3'

Other M13 primers can also be used as sequencing primers.

Plasmid Resuspension protocol

1. Centrifuge at 5,000×g for 5 min.
2. Carefully open the tube and add 100 µl of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin to concentrate the liquid at the bottom. Speed is less than 5000×g.
5. Store the plasmid at -20 °C.

The plasmid is ready for:

- Restriction enzyme digestion
- PCR amplification
- *E. coli* transformation
- DNA sequencing

E.coli strains for transformation (recommended but not limited)

Most commercially available competent cells are appropriate for the plasmid, e.g. TOP10, DH5α and TOP10F'.

Vector Information

pMD19-T Vector is a high-efficiency TA cloning vector constructed from pUC19, of which multiple cloning sites as shown below. The pMD19-T Vector is 2.6kb in size and contains the ampicin resistance gene for selection. The coding sequence was inserted by TA cloning at site 431.

Physical Map of pMD19-T (MCS destroyed) :

Manufactured By Sino Biological Inc., FOR RESEARCH USE ONLY. NOT FOR USE IN HUMANS.
