

## Anti-SCNM1 antibody

---

|                         |                                                                                                                         |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>      | Unconjugated Rabbit polyclonal to SCNM1                                                                                 |
| <b>Model</b>            | STJ191433                                                                                                               |
| <b>Host</b>             | Rabbit                                                                                                                  |
| <b>Reactivity</b>       | Human                                                                                                                   |
| <b>Applications</b>     | ELISA, WB                                                                                                               |
| <b>Gene ID</b>          | <a href="#">100534012</a>                                                                                               |
| <b>Gene Symbol</b>      | <a href="#">SCNM1</a>                                                                                                   |
| <b>Dilution range</b>   | WB 1:500-2000 ELISA 1:5000-20000                                                                                        |
| <b>Specificity</b>      | SCNM1 Polyclonal Antibody detects endogenous levels of protein.                                                         |
| <b>Purification</b>     | SCNM1 antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. |
| <b>Note</b>             | For Research Use Only (RUO).                                                                                            |
| <b>Protein Name</b>     | Sodium channel modifier 1                                                                                               |
| <b>Molecular Weight</b> | 25 kDa                                                                                                                  |
| <b>Clonality</b>        | Polyclonal                                                                                                              |
| <b>Conjugation</b>      | Unconjugated                                                                                                            |
| <b>Isotype</b>          | IgG                                                                                                                     |
| <b>Formulation</b>      | Liquid form in PBS containing 50% glycerol, and 0.02% sodium azide.                                                     |
| <b>Concentration</b>    | 1 mg/ml                                                                                                                 |

|                              |                                                                                                      |
|------------------------------|------------------------------------------------------------------------------------------------------|
| <b>Storage Instruction</b>   | Store at -20°C, and avoid repeat freeze-thaw cycles.                                                 |
| <b>Database Links</b>        | <a href="#">HGNC:23136OMIM:608095</a>                                                                |
| <b>Alternative Names</b>     | Sodium channel modifier 1                                                                            |
| <b>Function</b>              | Plays a role in RNA splicing, possibly contributing to the recognition of non-consensus donor sites. |
| <b>Cellular Localization</b> | Nucleus Nucleus speckle. Colocalizes with LUC7L2 and SNRNP70 in nuclear speckles.                    |
