

Anti-NR5A2 antibody

Description Unconjugated Rabbit polyclonal to NR5A2

Model STJ192282

Host Rabbit

Reactivity Human, Mouse, Rat

Applications ELISA, WB

Gene ID 2494

Gene Symbol NR5A2

Dilution range WB 1:500-2000 ELISA 1:5000-20000

Specificity NR5A2 Polyclonal Antibody detects endogenous levels of protein.

Tissue Specificity Abundantly expressed in pancreas, less in liver, very low levels in heart and

lung. Expressed in the Hep-G2 cell line. Isoform 1 and isoform 2 seem to be

present in fetal and adult liver and Hep-G2 cells.

Purification NR5A2 antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Note For Research Use Only (RUO).

Protein Name

Nuclear receptor subfamily 5 group A member 2 Alpha-1-fetoprotein

transcription factor B1-binding factor hB1F CYP7A promoter-binding factor

Hepatocytic transcription factor Liver receptor homolog 1 LRH-1

Molecular Weight 59 kDa

Clonality Polyclonal

Conjugation Unconjugated

Isotype IgG

Formulation Liquid form in PBS containing 50% glycerol, and 0.02% sodium azide.

Concentration 1 mg/ml

Storage Instruction Store at -20°C, and avoid repeat freeze-thaw cycles.

Alternative Names Nuclear receptor subfamily 5 group A member 2 Alpha-1-fetoprotein

transcription factor B1-binding factor hB1F CYP7A promoter-binding factor

Hepatocytic transcription factor Liver receptor homolog 1 LRH-1

Function Binds to the sequence element 5'-AACGACCGACCTTGAG-3' of the

enhancer II of hepatitis B virus genes, a critical cis-element of their expression and regulation. May be responsible for the liver-specific activity of enhancer II, probably in combination with other hepatocyte transcription factors. Key regulator of cholesterol 7-alpha-hydroxylase gene (CYP7A) expression in liver. May also contribute to the regulation of pancreas-specific genes and

play important roles in embryonic development.
