

Anti-Amylin antibody

Description Rabbit polyclonal to Amylin.

Model STJ91590

Host Rabbit

Reactivity Human

Applications ELISA, IF, IHC, WB

Immunogen Synthesized peptide derived from human Amylin

Immunogen Region 10-90 aa, N-terminal

Gene ID <u>3375</u>

Gene Symbol <u>IAPP</u>

Dilution range WB 1:500-1:2000IHC 1:100-1:300IF 1:200-1:1000ELISA 1:10000

Specificity Amylin Polyclonal Antibody detects endogenous levels of Amylin protein.

Purification The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Note For Research Use Only (RUO).

Protein Name Islet amyloid polypeptide Amylin Diabetes-associated peptide DAP

Insulinoma amyloid peptide

Molecular Weight 25 kDa

Clonality Polyclonal

Conjugation Unconjugated

Isotype IgG

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Concentration 1 mg/ml

Storage Instruction Store at -20°C, and avoid repeat freeze-thaw cycles.

Database Links HGNC:5329OMIM:147940

Alternative Names Islet amyloid polypeptide Amylin Diabetes-associated peptide DAP

Insulinoma amyloid peptide

Function Selectively inhibits insulin-stimulated glucose utilization and glycogen

deposition in muscle, while not affecting adipocyte glucose metabolism.

Sequence and Domain Family The mature protein is largely unstructured in the absence of a cognate ligand,

and has a strong tendency to form fibrillar aggregates. Homodimerization may

be the first step of amyloid formation.

Cellular Localization Secreted

Post-translational Amyloid fibrils are degraded by IDE.
