| <b>Dilution range</b>     | IHC 1:100-1:300IF 1:200-1:1000ELISA 1:5000                                                                                                                                                                                   |
| <b>Specificity</b>        | ATF-2 Polyclonal Antibody detects endogenous levels of ATF-2 protein.                                                                                                                                                        |
| <b>Tissue Specificity</b> | Ubiquitously expressed, with more abundant expression in the brain.                                                                                                                                                          |
| <b>Purification</b>       | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.                                                                                                        |
