

Anti-GK1 antibody

Description

Rabbit polyclonal to GK1.

Model STJ93275

Host Rabbit

Reactivity Human, Mouse, Rat

Applications ELISA, IF, WB

Immunogen Synthesized peptide derived from human GK1

Immunogen Region 430-510 aa, C-terminal

Gene ID <u>2710</u>

Gene Symbol GK

Dilution range WB 1:500-1:2000IF 1:200-1:1000ELISA 1:20000

Specificity GK1 Polyclonal Antibody detects endogenous levels of GK1 protein.

Tissue Specificity Highly expressed in the liver, kidney and testis. Isoform 2 and isoform 3 are

expressed specifically in testis and fetal liver, but not in the adult liver.

Purification The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Note For Research Use Only (RUO).

Protein Name Glycerol kinase GK Glycerokinase ATP:glycerol 3-phosphotransferase

Molecular Weight 57 kDa

Clonality Polyclonal

Conjugation Unconjugated

Isotype IgG

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Concentration 1 mg/ml

Storage Instruction Store at -20°C, and avoid repeat freeze-thaw cycles.

Database Links <u>HGNC:4289OMIM:300474</u>

Alternative Names Glycerol kinase GK Glycerokinase ATP:glycerol 3-phosphotransferase

Function Key enzyme in the regulation of glycerol uptake and metabolism.

Cellular Localization Mitochondrion outer membrane. Peripheral membrane protein. Cytoplasmic

side. Cytoplasm. In sperm and fetal tissues, the majority of the enzyme is bound to mitochondria, but in adult tissues, such as liver found in the

cytoplasm.
