

## Anti-Tetranectin antibody

|                           |                                                                                                           |
|---------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>Description</b>        | Rabbit polyclonal to Tetranectin.                                                                         |
| <b>Model</b>              | STJ98805                                                                                                  |
| <b>Host</b>               | Rabbit                                                                                                    |
| <b>Reactivity</b>         | Human, Mouse                                                                                              |
| <b>Applications</b>       | ELISA, IHC                                                                                                |
| <b>Immunogen</b>          | Synthetic peptide from human Tetranectin protein.                                                         |
| <b>Immunogen Region</b>   | 11-60 aa                                                                                                  |
| <b>Gene ID</b>            | <a href="#">7123</a>                                                                                      |
| <b>Gene Symbol</b>        | <a href="#">CLEC3B</a>                                                                                    |
| <b>Dilution range</b>     | IHC-P 1:50-300ELISA 1:5000-20000                                                                          |
| <b>Specificity</b>        | The antibody detects endogenous Tetranectin.                                                              |
| <b>Tissue Specificity</b> | Found in plasma.                                                                                          |
| <b>Purification</b>       | The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. |
| <b>Note</b>               | For Research Use Only (RUO).                                                                              |
| <b>Protein Name</b>       | Tetranectin TN C-type lectin domain family 3 member B Plasminogen kringle 4-binding protein               |
| <b>Clonality</b>          | Polyclonal                                                                                                |
| <b>Conjugation</b>        | Unconjugated                                                                                              |

|                              |                                                                                                                                    |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| <b>Isotype</b>               | IgG                                                                                                                                |
| <b>Formulation</b>           | PBS, pH 7.4, containing 0.02% sodium azide as Preservative and 50% Glycerol.                                                       |
| <b>Concentration</b>         | 1 mg/ml                                                                                                                            |
| <b>Storage Instruction</b>   | Store at -20°C, and avoid repeat freeze-thaw cycles.                                                                               |
| <b>Database Links</b>        | <a href="#">HGNC:11891OMIM:187520</a>                                                                                              |
| <b>Alternative Names</b>     | Tetranectin TN C-type lectin domain family 3 member B Plasminogen kringle 4-binding protein                                        |
| <b>Function</b>              | Tetranectin binds to plasminogen and to isolated kringle 4. May be involved in the packaging of molecules destined for exocytosis. |
| <b>Cellular Localization</b> | Secreted.                                                                                                                          |
