## Goat Anti-Rabbit IgG (H+L) antibody

---

|                            |                                                                                                                                    |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>         | FITC conjugated Goat polyclonal to Rabbit IgG (H+L)                                                                                |
| <b>Model</b>               | STJ99668                                                                                                                           |
| <b>Host</b>                | Goat                                                                                                                               |
| <b>Reactivity</b>          | Rabbit                                                                                                                             |
| <b>Applications</b>        | ELISA, IF, IHC, WB                                                                                                                 |
| <b>Dilution range</b>      | WB 1:5000-20000, ELISA 1 $\mu$ g-1 $\mu$ g10000-20000                                                                              |
| <b>Purification</b>        | Goat Anti-Rabbit IgG (H+L) antibody was affinity-purified from goat antiserum by affinity-chromatography using specific immunogen. |
| <b>Note</b>                | For Research Use Only (RUO).                                                                                                       |
| <b>Protein Name</b>        | Goat Rabbit IgG (H+L)                                                                                                              |
| <b>Clonality</b>           | Polyclonal                                                                                                                         |
| <b>Conjugation</b>         | FITC                                                                                                                               |
| <b>Formulation</b>         | Liquid form in PBS containing 50% glycerol, 0.5% BSA & 0.02% sodium azide.                                                         |
| <b>Concentration</b>       | ~4mg/mL                                                                                                                            |
| <b>Storage Instruction</b> | Store in fridge at +4°C. Freezing not recommended.                                                                                 |
| <b>Alternative Names</b>   | Goat Rabbit IgG (H+L)                                                                                                              |
