

## Protein G Immunoprecipitation Kit

### Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Appearance:

Storage: store at 4°C

### Biological Description

Description	TargetMol Protein G Immunomagnetic Beads enables Protein G to cover superparamagnetic microspheres with high density by utilizing bio-nano technology. Protein G Immunomagnetic Beads can be used for the immunoprecipitation (IP) of proteins, protein complexes, protein-nucleic acid complexes, and other antigens. The Protein G Immunoprecipitation Kit comes with prepared buffers to provide a relatively better condition for immunoprecipitation and to enhance the stability. This product is suitable for antigen samples derived from cell lysates, cell culture supernatants, serum, ascites, and other sources.
