

Chromocarb

Chemical Properties

CAS No. :	4940-39-0
Formula:	C ₁₀ H ₆ O ₄
Molecular Weight:	190.15
Appearance:	no data available
Storage:	Powder: -20°C for 3 years In solvent: -80°C for 1 year

Biological Description

Description	Chromocarb (Chromone-2-carboxylic acid) is a vascular protective agent used to treat venous disorders and microvascular affections.
Targets(IC50)	Others
In vitro	Rats treated orally with Chromocarb exhibited a significant reduction in vascular wall degradation induced by intravenous collagenase. Chromocarb treatment led to a decreased increase in BBB (blood-brain barrier) permeability, accelerated recovery, lower hydroxyproline levels in cerebrospinal fluid, and a lesser decline in collagen content within the cerebral capillary basement membranes. Furthermore, at a dose of 50 mg/kg, Chromocarb was more effective than vitamin C at preventing the oxidation of reduced glutathione in the blood.

Solubility Information

Solubility	H ₂ O: < 1 mg/mL (insoluble or slightly soluble), DMSO: 50 mg/mL (262.95 mM), Sonication is recommended. Ethanol: < 1 mg/mL (insoluble or slightly soluble), (< 1 mg/ml refers to the product slightly soluble or insoluble)

Preparing Stock Solutions

	1mg	5mg	10mg
1 mM	5.259 mL	26.295 mL	52.5901 mL
5 mM	1.0518 mL	5.259 mL	10.518 mL
10 mM	0.5259 mL	2.6295 mL	5.259 mL
50 mM	0.1052 mL	0.5259 mL	1.0518 mL

Please select the appropriate solvent to prepare the stock solution, according to the solubility of the product in different solvents. Please use it as soon as possible.
